

# LEAF RETAIN<sup>†</sup> 990

## BALE BOOST

Leaf Retain Bale Boost is a product which temporarily restores moisture to retain leaf matter of cut hay to extend the baling period in hot, dry conditions.

Active Constituent: Blend of nonionic surfactants and humectants

### DIRECTIONS FOR USE

APPLICATION	RATE	COMMENT
Legume and cereal hay	1L in 50 - 100L of water/T of DM yield.	Apply directly to the windrow using Hayspray applicator directly before baling. For best results apply 10 - 120 minutes prior to baling. For very low humidity shorten the interval between application and baling Leaf Retain can be applied with Bale Shield.

### STORAGE AND HANDLING:

Store in closed original container out of direct sunlight. Dispose of contents/container in accordance with local regulations.

### FIRST AID AND SAFETY DIRECTIONS:

Causes skin irritation and serious eye irritation. Avoid contact with skin and eyes. Contact a doctor or Poisons Information Centre (Phone Australia 131126) or consult Safety Data Sheet from the supplier for more information.
